

Premium translations
For dentistry and the dental industry

What others have said about us

"... And as far as quality is concerned, with you and Triacom, it feels like we are riding in the Mercedes of (German) translation. That's where we want to be and feel. Rolls Royces and Jaguars are too flashy and they need too much gas anyway"

CHRISTOPHE RÉTHORÉ, QUALITATIVE RESEARCH DIRECTOR, AFG RESEARCH, VANCOUVER, CANADA

"Thank you so much for your extra effort yesterday. Translators like you and Thea make my work flow much more smoothly ... Be warned that we may very well be asking you for something like that again very soon."

AMANDA CROPPER, ASET INTERNATIONAL, WASHINGTON, DC, USA

"I send my great thanks for the quality and speed in which you finished this. I really appreciate the corrections and feedback as well. I must say that I am thoroughly impressed. I suspect that this will not be the last time."

TRAVIS LEER, MANAGING DIRECTOR, SAGEMAX DENTAL, BERLIN, GERMANY

"This once again goes to show that you are worth every cent."

MARION BRAUN, PUBLIC RELATIONS, ZIRKONZAHN, GAIS, ITALY

What you can get from us

We translate

We translate texts from the fields of dentistry and dental technology from German, English, Swedish, Danish, and Norwegian to German and English. For specific projects we also work with Dutch, French, Italian, Portuguese, and Spanish.

We review and copyedit

We check your texts for readability, clarity, and style. We find and fix errors and inconsistencies. We check facts, cross-references and other verifiable details and suggest improved wording through substantive and developmental edits as well as evaluate documents under cultural, marketing, terminological, and user-appeal aspects.

We adapt and transcreate

Based on your briefings, storyboards, and original copy, we create new texts that work for German, including: press releases, mailings and newsletters, marketing and promotional copy, advertisements, flyers, websites.

Service

We respond quickly and flexibly to your needs. Send us your text and you will get your quote promptly—often within 24 hours or less. And if your deadline is extra tight, we can often help with a rush translation.

We are located in the heart of Northern Germany—but business is global, and so are we. For clients located in other time zones or just working late (or early), we are usually available from 9 am to 8 pm local time (3 am to 2 pm U.S. Eastern time)—often later.

Facts that speak for themselves

1,600 published articles in **40** international journals, including: Die Quintessenz, EDI Journal, Journal of Craniomandibular Function, International Journal of Computerized Dentistry, Journal of Biomedical Materials Research, Quintessence of Dental Technology ...
